WOODEN FIXING PIN MADE OUT OF BEECH WITH PRE-ASSEMBLED CROSSBAR

iGGfix beech Q30

DESCRIPTION

iGGfix beech Q30 is a 30 cm wooden fixing pin with a 5 cm wide pre-assembled crossbar. The pins are made of hardwood, which is crushproof and knotless as well as fine-sawn and untreated. In order to support a quick installation process of pins, their end is sharpened. Due to the small cross-section of 1 x 2 cm the pins are lighter compared to pins made out of spruce. Besides advantages in processing, logistics can be handled easier too.

USE

The wooden fixing pin iGGfix beech Q30 is being used for installation of erosion control blankets (iGGmat) and geotextiles (iGGtecX). We recommend two to three pieces per square meter for slopes of up to 1:1 (45°). For slopes of more than 45° approximately four to six pieces per square meter should be used.

DIMENSIONS

	Length	Cross-section	Crossbar
iGGfix beech Q30	30,0 cm	1,0 x 2,0 cm	5,0 cm

PACKING

	Boxes	Europallet
Number	250 pieces	84 boxes
Weight	8,25 kg	792 kg
Dimensions (L x W x H)	0,33 x 0,33 x 0,29 cm	100,0 x 135,0 x 230,0 cm
